

## HTML Jumps and Hyperlinks

**An Example of a Jump Within a Program.** The following is an example of a program that contains a hyperlink, which permits a jump to another point within the document. Copy it and save it as **Jump Within.html**.

```
<HTML>
  <HEAD>
    <TITLE>A Jump Within a Document</TITLE>
  </HEAD>
  <BODY>
    <A NAME="JumpTop"></A>
    This is the top of the screen.
    <IMG SRC="Image1.gif">(Here you should replace Image1.gif with the name of your image file.)
    This is the middle of the screen.
    <IMG SRC="Image2.gif"> (Here you should replace Image2.gif with the name of your image file.)
    This is the bottom of the screen.
    <A HREF="#JumpTop">Jump to Top of Screen</A>
  </BODY>
</HTML>
```

### Jumps to Other Documents

**Creating a Program to Read a First Image.** This program will read an image called Image1.gif. Save it as **Picture 1.html**.

```
<HTML>
  <HEAD>
    <TITLE> Displaying an Image</TITLE>
  </HEAD>
  <BODY>
    This is an image of a (Here you should describe your image using your own words).
    <IMG SRC="Image1 .gif"> (Here you should replace Image1.gif with the name of your image file.)
  </BODY>
</HTML>
```

**Creating a Program to Read a Second Image.** This program will read an image called Image2.gif and contains a hyperlink to link to Picture1.html. Save it as **Picture2.html**.

```
<HTML>
  <HEAD>
    <TITLE> Displaying an Image</TITLE>
  </HEAD>
  <BODY>
    This is an image of a (Here you should describe your image using your own words).
    <IMG SRC="Image2.gif">(Here you should replace Image2.gif with the name of your image file.)
    <A HREF="Picture1 .html"> Jump to the first image</A>
  </BODY>
</HTML>
```

**Modify Picture1.html** to jump back to **Picture2.html**. Devise a suitable message to use as a hyperlink.

### Using a Hyperlink

**An Example of Using words as a Hyperlink.** Try changing it so that you replace the “Google...click here” words with an image.

```
<HTML>
  <HEAD>
    <TITLE> Using an Image as a Hyperlink</TITLE>
  </HEAD>
  <BODY>
    <A HREF="http://www.google.ca ">Google...click here</A>(Replace Image2.gif with your image file.)
  </BODY>
</HTML>
```

Here, we use google as the page to link with. It could be a page that you have created. <IMG SRC="Image2.gif">
